3	Summary	1

1 Introduction

This document outlines the outcome of completed system tests. Incidents, Defects and Changes that need to be made will be presented here formally. Although the ideas expressed here are separate entities, they will be combined into this one document.

2 Defects

At this time, defects that were found were labeled as incidents. Many of what we consider defects were self made defects that were hard to find but easy to correct. Incidents were found that had the opportunity of turning into defects in the system had they not been able to be corrected.

3 Summary

The testing procedure to date has been conducted using manual system testing and concurrent unit testing. Features tested include but are not limited to:

1. Ability for a user to register via account number

Test Case: 1.1

2. Ability for a user to login via customer ID, email, Password.

Test Case: 1.2

3. Ability for a user to make a new transaction

Test Case: 1.3

4. Ability for a user to download a transaction history in CSV file.

Test Case: 1.4
